gpliaison@epworth.org.au

Please join us for a sunset dinner at Epworth Richmond, with views over the city, and an opportunity to meet some of our cardiologists.

Topics | Speakers

Breathlessness is one of the most common presentations for patients. The topics for the evening will help inform General Practitioners by discussing relevant cardiac investigations for diagnosis and further explore the latest treatment options for patients with advanced valvular heart disease.

1. Murmurs matter – diagnosing the breathless patient

Dr Alexandra Murphy, General, Imaging & Cardio-Oncologist

Learning outcome: Clinically assess and appropriately work up the breathless patient with suitable cardiac imaging modalities.

2. A heart team approach to management of severe aortic stenosis – TAVI for all?

Dr Anoop Koshy, Interventional, Structural & General Cardiologist

Learning outcome: Outline the treatment options for patients with severe aortic stenosis and understand the value of the heart team to ensure the best treatment option for each individual patient.

3. Mitral regurgitation, the undertreated valve – the rise of MitraClip

Dr Matias Yudi, Structural & Interventional Cardiologist

Learning outcome: Understand the importance of identifying, managing and treating mitral regurgitation in patients with heart failure and early referral to a heart team.
