

# Bowel Cancer Screening, Iron Deficiency & Other Common Endoscopy Referrals

Presented by [Dr Elliot Freeman](#), Gastroenterologist

**THURSDAY 14th MARCH 2024 | 7.00pm – 8.00pm**

Accredited CPD activity | Webinar presentation with Q&A

## OVERVIEW

Colorectal cancer is the third most common type of newly diagnosed cancer in Australia and 99% of cases can be treated successfully if found early. It is therefore important to be familiar with the current screening guidelines. Additionally, iron deficiency is a common presentation in primary care. This talk will summarise the key points in managing this condition and identifying patients who require endoscopic investigation.

## LEARNING OUTCOMES

1. Outline the current Australian guidelines for colorectal cancer screening including for previous polyps and strong family history
2. Discuss the management of iron deficiency and Identify patients requiring endoscopic investigation
3. Review other common indications for open/direct access endoscopy
