

Topics | Specialists

1. New technologies for treating Knee Osteoarthritis: case-based discussions

Mr Matthew Alexander, Orthopaedic Surgeon (Hip, Knee, Sports, Trauma)

Interactive case-based discussions common to GP practice to help in the assessment of arthritic knee pain and highlight newer technologies now available to manage this; both non-replacement and replacement options.

2. The 4 pillars of Heart Failure Management

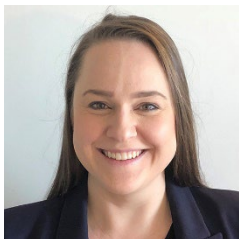

Dr Chris Anthony, Advanced Cardiac Imaging & General Cardiologist

Emphasise the role of GPs in managing heart failure and review signs & symptoms of HFrEF. Explain the aim to have HFrEF patients on the 4 pillars of GDMT: ARNI + BB + MRA + SGLT2I.

3. Arthritis of the Shoulder

Dr Pamela Boekel, Orthopaedic Surgeon (Shoulder, Elbow, Sports Trauma)

Discuss the types of Shoulder arthritis, clinical picture, recommended investigations, non-surgical and surgical treatment – indications and expected outcomes.

4. Bariatric Surgery Guidelines

Dr Daniel Foley, Upper GI, Bariatric & General Surgeon

A summary of the updated international federation of surgical obesity clinical guidelines, and recommendations on eligibility criteria for bariatric and metabolic surgery.

5. The new paradigm in managing cutaneous NMSCs

Dr Vachara Niumsawatt, Plastic Surgeon

Understanding of what constitutes a poor prognostication in cutaneous NMSC has changed from cancer subtype to genetic make-up of these tumours. An outline on what to look for, current comparison and recommendation of surgical vs non-surgical treatment, and deep margin.
