

# Colorectal Cancer — New Frontiers

Presented by the Epworth Cancer Services Institute

Saturday, 7 October 2023 | 8.00am – 2.00pm  
Epworth Richmond Auditorium

The institute focuses on the diagnosis, treatment and care of patients with cancer. Epworth is the only private hospital group in Victoria offering all forms of cancer treatment in-house.

Using case based discussion, this seminar will provide primary care practitioners, nurses, trainees and other interested health professionals with an update on colorectal cancer care. Topics will span across developments in research and new treatment therapies, as well as advice on managing patients in the primary care setting.

Chaired by Cancer Services Clinical Institute Director, A/Prof Sumitra Ananda and Dr Costas Yannakou.

## Topics covered

- > Screening and early detection of colorectal cancer
- > Inherited bowel cancer predisposition syndromes
- > Management of early colorectal cancer
- > Spotlight on rectal cancer including stoma management
